- Voice Calls
- Room Service
- Checkout
- Concierge Local Activities
- Maid Service

“Easy Voice empowers our guests to a new level of much needed service in the Hospitality industry. It has improved our customer service ratings and online reviews by giving us a competitive edge and an experience guests remember”

Josh Wolfe
CIO
HLP Hotel Properties

Hospitality Voice Alexa Voice Integrated Hospitality Solutions by Easy Voice

Empower Guests with Service Requests

Guests simply ask their rooms for things like more towels or housekeeping services and EasyVoice efficiently routes the request.

Recommendations

Provide top-quality local recommendations to your guests - dinner recommendations from your property's chef, drink recommendations from the resident mixologist or favorite attractions shared by a local celebrity.

Hospitality Control Tower

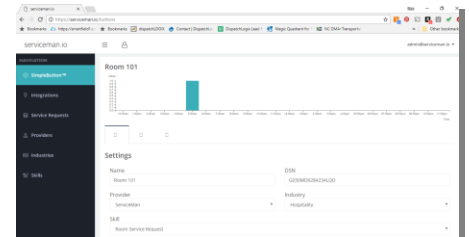

View all guest requests, service, and hotel activity with easy access to times, dates, and requests. View historic graphs and integrate with existing POS and PMS systems to share important guest data.

Guest Information

Provide quick answers to the most common questions, like what's the wi-fi password. By sharing information in a fun and interactive way you can stop the guest services phone from ringing with the same questions over and over again and even redirect your guests toward high margin offerings.

Welcome Guests

Make guests feel instantly welcome with custom greetings for VIPs, wedding guests, conference attendees, or any other group.
